DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to light fibers, rods or pipes with filter device, classified in class 362, subclass 583.
 - II. Claims 17-52, drawn to light modifier, generally including a housing and within the housing, the modifier that is adjustable or positionable, classified in class 362, subclass 319.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because light fibers, rods or pipes with filter device and light modifier being adjustable or positionable has two separate utility. where the subcombination has separate utility such as illuminated sign with color wheel, motor unit, wheel shaft, fiber optic cable, and display.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
